

Q1: Could you please clarify the shooting locations for the video and photo projects? Are all the shoots taking place within Libya, or will there be any locations in Tunisia as well?

A1: Shooting locations for video and photo projects will be primarily within Libya with some work in Tunis.

Q2: As I am currently based in Tunis, it would be helpful for me to understand the expected frequency of travel to Libya throughout the duration of the project. Could you provide an estimate of how often the service provider would need to travel to Libya for the video and photo shoots?

A2: This depends on trip duration and how much ground the vendor would be able to cover. No more than once a month.

Q3: Could you kindly provide clarification on the anticipated duration of the project? While the job announcement mentions specific timelines for delivering drafts and photos, I would like to understand the overall timeframe of the project, including the expected start and end dates.

A3: The performance period is 12 months from the start of the project. We expect to launch the project August 2023 and it run through August 2024.
